SCOPE OF SUPPLY

The vessel is a vertical, cylindrical frp vessel fabricated by the filament-wound method in accordance with ASTM D-3299-18. Primary dimensions: 10'-0" ID × 12'-0" straight-shell height, with a flat ring supported bottom and f and d. Net shell capacity is approximately 7,050 gal.

100-mil nominal corrosion barrier: C-veil surface mat backed by two plies of chopped strand mat, wet-out with corrosion-grade resin. Structural laminate sized for the service conditions below; exterior finished with a UV-resistant pigmented topcoat.
